ABOUT US

2006: Wrightfield PPF is formed to build and supply moving pool floors.

2007 - The first moving pool floor is installed in Edmonton.

2010 - Wrightfield PPF becomes Wrightfield Pools and now provides full manufacturing, installation and servicing of stainless-steel pools.

2014 - Lido pool built in Pontypridd, Wales.

2015 - The first commercial stainless steel pool installation at Crewe Leisure Centre, including a 25m pool and 17m learner pool.

2016 - Stainless steel plunge pools at KX Club, London.

2022 - Elevated stainless steel pool at Smugglers Way, Wandsworth, London.

2023 - Largest moving pool floor commissioned in New Zealand.

DESIGN & PLANNING

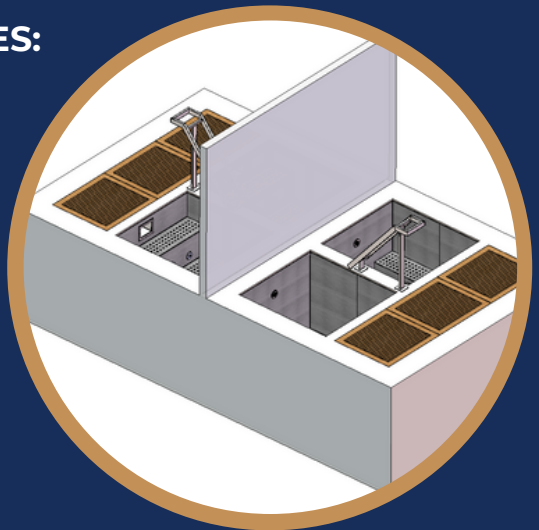

We have extensive experience in designing, planning, and building bespoke pool solutions for both domestic and commercial applications.

Our team works closely with homeowners, architects, pool designers and commercial developers and we always aim to deliver tailor-made pools and floors that meet specific requirements and aesthetic preferences.

OUR EXPERTISE INCLUDES:

- Detailed explanation of the design process, including collaboration with clients.
- Use of CAD software for precision planning and visualisation.
- Custom design services tailored to client specifications and site requirements.

MANUFACTURING CAPABILITY

With over 40,000 Sq Ft of office and development space, we are well served to offer our customers the best possible design and build service.

Fabrication and CNC:

Folding, bending, cutting and machined parts - all done on-site.

High-Quality Materials: We use top-grade stainless steel and other materials for durable, visually striking pools and floors.

In-house Welding and Finishing:

Our skilled team ensures seamless, watertight construction with precision welding and finishing.

Precise Assembly: Our modern and fully equipped facilities ensure precise crafting of stainless steel pools, moving pool floors and components.

STAINLESS STEEL POOL MATERIALS

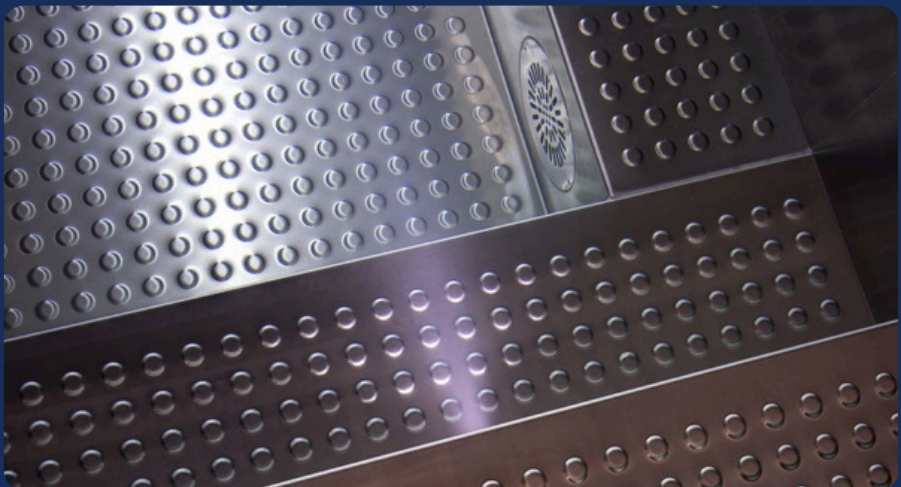

Our materials expertise ensures the highest quality in every panel, frame and component we produce and source.

From stainless steel steps and custom rails to ladders, hydrotherapy jets, light fittings and everything in between.

316 Stainless Steel: Known for its superior corrosion resistance, 316 stainless steel is the best choice for swimming pools. Its resistance to pitting and staining from chlorine and other chemicals ensures a long-lasting, low-maintenance pool surface.

Additionally, the sleek, polished appearance of stainless steel enhances the pool's aesthetics, giving it a modern, luxurious look that reflects light beautifully, creating an inviting and enjoyable swimming environment.

MOVING POOL FLOOR MATERIALS

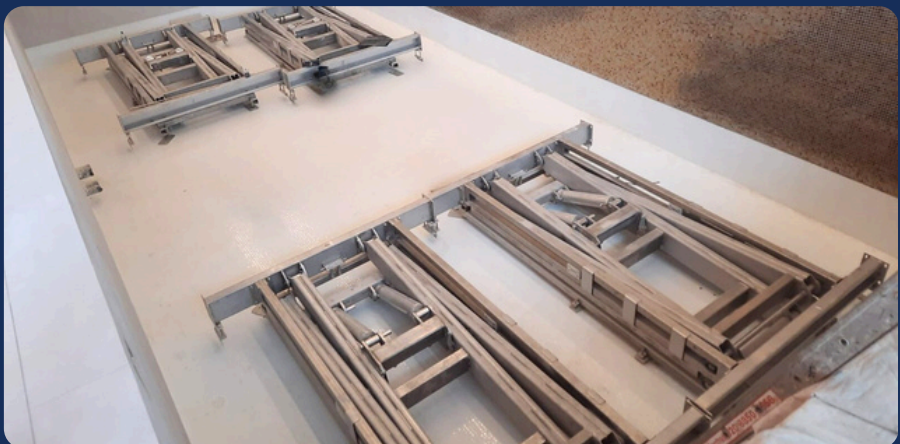

Wrightfield Pools' moving pool floors are crafted using the highest quality materials.

The primary structure is built from robust stainless steel, offering excellent resistance to corrosion and wear, especially in aquatic environments.

The surface can be customised with anti-slip coatings or luxurious finishes to match the pool's design.

Precision-engineered hydraulic systems and waterproof components guarantee smooth and reliable operation, making our moving pool floors both functional and visually stunning

PROJECTS

ETON COLLEGE

Moving Pool Floors

Engineered to seamlessly transform your pool's depth at the touch of a button, these floors offer unparalleled flexibility, safety, and space optimisation.
